Bookcase
Effect Details: Preserve Books: ReAq(An,He)12 (Base 5, +1
Touch, +6 Constant)
Total: Build Points: 0 0

Notes

Aura: 2

The aura fills the cavern but does not extend any further.
Altering the cavern extent would disrupt the aura.

The aura would normally be included on the covenant sheet
but has been included here (as a free virtue) to avoid the need
for a separate covenant record.

Specialisations:

Te +1 *

Aq +2 *

Re +6 *

Vis Extraction +1

* reduced by Undecorated flaw.

These flaws cannot be removed as to do so would disrupt the
aura:

Subterranean

Cramped

Features:

* A mansized wrought-iron cage with a latch, rather than a
lock, in the center of the chamber.

* A pool fed by a spring, which feeds a stream that runs
around the edge of the chamber. During the spring thaw,
Aquam vis can be harvested from the pool - normally 5 pawns
but this may vary if winter was especially harsh or soft.
